

How to activate the satellite modem

1. In the MIRA station an Iridium Edge modem is built in:

2. This needs to be activated with an Iridium provider.
3. Please tell the Iridium provider to forward the packages to
 - a. your public IP on **port 31800** and additionally
 - b. to an email address to be able to check the messages independently.
4. The cost for the transmission is the same for up to four receivers.
